

# Dust Covered Patch Panels

Telesafes classic series of panels where the shielded version offers dust covered ports as a standard feature.

All the Data Patch Panels from Telesafe meet the electrical specifications of the latest ISO/IEC 11801 and CENELEC 50173 standards. Each of the panels may be installed in a mix-and-match Class D(100 MHz, "Cat.5e") cabling solution, or as one component in a Class E-250 MHz channel cabling system.

**Some features:**

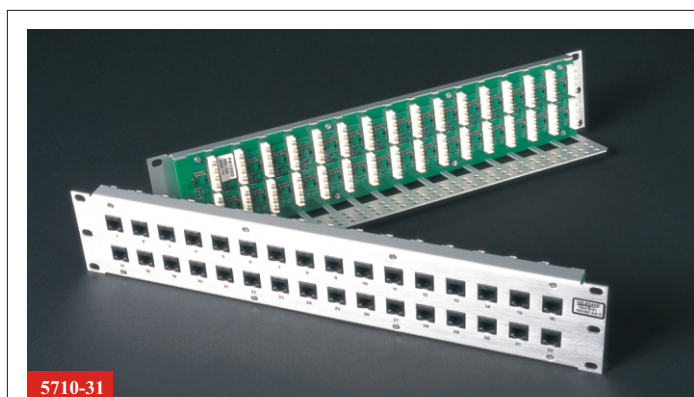

- Shielded and unshielded
- The shielded version is delivered with dust covers as standard
- 16 port (1U) and 32 ports (2U)
- Allows maximum space for operation
- Brushed aluminium design

All panels are manufactured out of 100% recyclable materials.

**15 year product guarantee.**

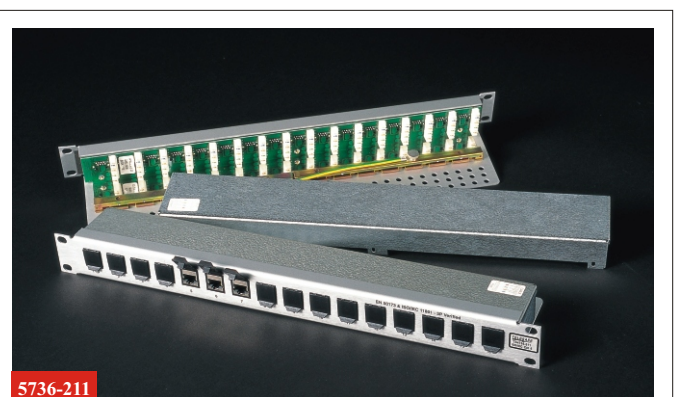

32-ports shielded patch panel with dustcovers **5732-211**

**5710-31**

32-ports unshielded patch panel, 2U
