

## Patch panel accessories

Telesafe provides a wide range of patch panel accessories to be used in the rack closet. A variety of patch cable guides and other devices are available including a patch cable organiser. For the installer, the mounting board is especially designed to make a small and steady working table which can easily be inserted into the rack's rails and then moved as the termination work progresses. The mounting board is designed to simplify the termination work with the Telesafe Patch Panels, thus saving time by each installation.
